Spectrum Analysis Report

prepared by the Pi-MEP Consortium

October 15, 2024

Contents

1	Overview	21
2	Methodology	22
3	TSG data	23
3.1	North Atlantic region	23
3.2	Tropical Atlantic region	23
3.3	Tropical Pacific region	24
3.4	Arctic region	24
3.5	Southern Ocean region	25
3.6	Western Pacific region	26
4	Satellite products	27
4.1	SMOS SSS L3 v332 - 9 Days (CATDS-CPDC)	28
4.1.1	North Atlantic region	28
4.1.2	Topical Atlantic region	29
4.1.3	Tropical Pacific region	30
4.1.4	Arctic region	31
4.1.5	Southern Ocean region	32
4.1.6	Western Pacific region	33
4.2	SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC)	34
4.2.1	North Atlantic region	34
4.2.2	Topical Atlantic region	35
4.2.3	Tropical Pacific region	36
4.2.4	Arctic region	37
4.2.5	Southern Ocean region	38
4.2.6	Western Pacific region	39
4.3	SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC)	40
4.3.1	North Atlantic region	40
4.3.2	Topical Atlantic region	41
4.3.3	Tropical Pacific region	42
4.3.4	Arctic region	43
4.3.5	Southern Ocean region	44
4.3.6	Western Pacific region	45
4.4	SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN)	46
4.4.1	North Atlantic region	46
4.4.2	Topical Atlantic region	47
4.4.3	Tropical Pacific region	48
4.4.4	Arctic region	49
4.4.5	Southern Ocean region	50
4.4.6	Western Pacific region	51
4.5	SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN)	52
4.5.1	North Atlantic region	52
4.5.2	Topical Atlantic region	53
4.5.3	Tropical Pacific region	54
4.5.4	Arctic region	55
4.5.5	Southern Ocean region	56
4.5.6	Western Pacific region	57

4.6	SMOS SSS L3 v2 - 9-Days (BEC)	58
4.6.1	North Atlantic region	58
4.6.2	Topical Atlantic region	59
4.6.3	Tropical Pacific region	60
4.6.4	Arctic region	61
4.6.5	Southern Ocean region	62
4.6.6	Western Pacific region	63
4.7	SMAP SSS L3 v6 - 8-Day running (RSS)	64
4.7.1	North Atlantic region	64
4.7.2	Topical Atlantic region	65
4.7.3	Tropical Pacific region	66
4.7.4	Arctic region	67
4.7.5	Southern Ocean region	68
4.7.6	Western Pacific region	69
4.8	SMAP SSS L3 v6 - Monthly (RSS)	70
4.8.1	North Atlantic region	70
4.8.2	Topical Atlantic region	71
4.8.3	Tropical Pacific region	72
4.8.4	Arctic region	73
4.8.5	Southern Ocean region	74
4.8.6	Western Pacific region	75
4.9	SMAP SSS L3 v5.0 - 8-Day running (JPL)	76
4.9.1	North Atlantic region	76
4.9.2	Topical Atlantic region	77
4.9.3	Tropical Pacific region	78
4.9.4	Arctic region	79
4.9.5	Southern Ocean region	80
4.9.6	Western Pacific region	81
4.10	SMAP SSS L3 v5.0 - Monthly (JPL)	82
4.10.1	North Atlantic region	82
4.10.2	Topical Atlantic region	83
4.10.3	Tropical Pacific region	84
4.10.4	Arctic region	85
4.10.5	Southern Ocean region	86
4.10.6	Western Pacific region	87
4.11	Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC)	88
4.11.1	North Atlantic region	88
4.11.2	Topical Atlantic region	89
4.11.3	Tropical Pacific region	90
4.11.4	Arctic region	91
4.11.5	Southern Ocean region	92
4.11.6	Western Pacific region	93
4.12	Aquarius SSS L3 OR v5 - Monthly (NASA-GSFC)	94
4.12.1	North Atlantic region	94
4.12.2	Topical Atlantic region	95
4.12.3	Tropical Pacific region	96
4.12.4	Arctic region	97
4.12.5	Southern Ocean region	98
4.12.6	Western Pacific region	99

4.13	Aquarius SSS L3 OR v5 - 7-Day running - Rain mask (NASA-GSFC)	100
4.13.1	North Atlantic region	100
4.13.2	Topical Atlantic region	101
4.13.3	Tropical Pacific region	102
4.13.4	Arctic region	103
4.13.5	Southern Ocean region	104
4.13.6	Western Pacific region	105
4.14	Aquarius SSS L3 OR v5 - Monthly - Rain mask (NASA-GSFC)	106
4.14.1	North Atlantic region	106
4.14.2	Topical Atlantic region	107
4.14.3	Tropical Pacific region	108
4.14.4	Arctic region	109
4.14.5	Southern Ocean region	110
4.14.6	Western Pacific region	111
4.15	Aquarius SSS L3 CAP v5 - 7-Day running (JPL)	112
4.15.1	North Atlantic region	112
4.15.2	Topical Atlantic region	113
4.15.3	Tropical Pacific region	114
4.15.4	Arctic region	115
4.15.5	Southern Ocean region	116
4.15.6	Western Pacific region	117
4.16	Aquarius SSS L3 CAP v5 - Monthly (JPL)	118
4.16.1	North Atlantic region	118
4.16.2	Topical Atlantic region	119
4.16.3	Tropical Pacific region	120
4.16.4	Arctic region	121
4.16.5	Southern Ocean region	122
4.16.6	Western Pacific region	123
4.17	SMOS SSS L4 OI v346 - Weekly (CMEMS-CATDS-LOPS)	124
4.17.1	North Atlantic region	124
4.17.2	Topical Atlantic region	125
4.17.3	Tropical Pacific region	126
4.17.4	Arctic region	127
4.17.5	Southern Ocean region	128
4.17.6	Western Pacific region	129
4.18	SMOS SSS L4 v1 - Daily (CMEMS-CNR)	130
4.18.1	North Atlantic region	130
4.18.2	Topical Atlantic region	131
4.18.3	Tropical Pacific region	132
4.18.4	Arctic region	133
4.18.5	Southern Ocean region	134
4.18.6	Western Pacific region	135
4.19	SMOS SSS L4 v1 - Monthly (CMEMS-CNR)	136
4.19.1	North Atlantic region	136
4.19.2	Topical Atlantic region	137
4.19.3	Tropical Pacific region	138
4.19.4	Arctic region	139
4.19.5	Southern Ocean region	140
4.19.6	Western Pacific region	141

4.20	CCI SSS L4 Merged-OI v4.41 - 7-day running (ESA)	142
4.20.1	North Atlantic region	142
4.20.2	Topical Atlantic region	143
4.20.3	Tropical Pacific region	144
4.20.4	Arctic region	145
4.20.5	Southern Ocean region	146
4.20.6	Western Pacific region	147
4.21	CCI SSS L4 Merged-OI v4.41 - 30-day running (ESA)	148
4.21.1	North Atlantic region	148
4.21.2	Topical Atlantic region	149
4.21.3	Tropical Pacific region	150
4.21.4	Arctic region	151
4.21.5	Southern Ocean region	152
4.21.6	Western Pacific region	153
4.22	SMAP SSS L4 OI v3 - Daily (ESR)	154
4.22.1	North Atlantic region	154
4.22.2	Topical Atlantic region	155
4.22.3	Tropical Pacific region	156
4.22.4	Arctic region	157
4.22.5	Southern Ocean region	158
4.22.6	Western Pacific region	159
4.23	SMAP SSS L4 OI v3 - Monthly (ESR)	160
4.23.1	North Atlantic region	160
4.23.2	Topical Atlantic region	161
4.23.3	Tropical Pacific region	162
4.23.4	Arctic region	163
4.23.5	Southern Ocean region	164
4.23.6	Western Pacific region	165
4.24	Aquarius SSS L4 OI v5 - Weekly (IPRC)	166
4.24.1	North Atlantic region	166
4.24.2	Topical Atlantic region	167
4.24.3	Tropical Pacific region	168
4.24.4	Arctic region	169
4.24.5	Southern Ocean region	170
4.24.6	Western Pacific region	171
4.25	Aquarius SSS L4 OI v5 - Monthly (IPRC)	172
4.25.1	North Atlantic region	172
4.25.2	Topical Atlantic region	173
4.25.3	Tropical Pacific region	174
4.25.4	Arctic region	175
4.25.5	Southern Ocean region	176
4.25.6	Western Pacific region	177
4.26	ISAS v7 - Monthly (Ifremer-LOPS-CMEMS)	178
4.26.1	North Atlantic region	178
4.26.2	Topical Atlantic region	179
4.26.3	Tropical Pacific region	180
4.26.4	Arctic region	181
4.26.5	Southern Ocean region	182
4.26.6	Western Pacific region	183

5	Density and Coherency spectra	184
5.1	North Atlantic region	184
5.2	Topical Atlantic region	185
5.3	Tropical Pacific region	186
5.4	Arctic region	187
5.5	Southern Ocean region	188
5.6	Western Pacific region	189
6	Spectral slopes and effective resolution	190
6.1	North Atlantic region	190
6.2	Topical Atlantic region	191
6.3	Tropical Pacific region	192
6.4	Arctic region	193
6.5	Southern Ocean region	194
6.6	Western Pacific region	195
7	Conclusion	196

List of Figures

1	Scatter plot of the 55 TSG transects where the color represent the measured SSS.	23
2	Scatter plot of the 21 TSG transects where the color represent the measured SSS.	24
3	Scatter plot of the 29 TSG transects where the color represent the measured SSS.	24
4	Scatter plot of the 29 TSG transects where the color represent the measured SSS.	25
5	Scatter plot of the 62 TSG transects where the color represent the measured SSS.	26
6	Scatter plot of the 49 TSG transects where the color represent the measured SSS.	27
7	Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product.	28
8	Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product.	29
9	Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product.	30
10	Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product.	31
11	Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product.	32

12	Density spectra (Top) calculated from averaging 49 TSG transects (black line) and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product.	33
13	Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC) Satellite product.	34
14	Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC) Satellite product.	35
15	Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC) Satellite product.	36
16	Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC) Satellite product.	37
17	Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC) Satellite product.	38
18	Density spectra (Top) calculated from averaging 49 TSG transects (black line) and collocated SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC) Satellite product.	39
19	Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product.	40
20	Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product.	41
21	Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product.	42

22	Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product.	43
23	Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product.	44
24	Density spectra (Top) calculated from averaging 49 TSG transects (black line) and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product.	45
25	Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product.	46
26	Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product.	47
27	Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product.	48
28	Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product.	49
29	Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product.	50
30	Density spectra (Top) calculated from averaging 49 TSG transects (black line) and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product.	51
31	Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product.	52
32	Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product.	53

33	Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product.	54
34	Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product.	55
35	Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product.	56
36	Density spectra (Top) calculated from averaging 49 TSG transects (black line) and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product.	57
37	Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product.	58
38	Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product.	59
39	Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product.	60
40	Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product.	61
41	Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product.	62
42	Density spectra (Top) calculated from averaging 49 TSG transects (black line) and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product.	63
43	Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product.	64

44	Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product.	65
45	Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product.	66
46	Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product.	67
47	Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product.	68
48	Density spectra (Top) calculated from averaging 49 TSG transects (black line) and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product.	69
49	Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product.	70
50	Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product.	71
51	Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product.	72
52	Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product.	73
53	Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product.	74
54	Density spectra (Top) calculated from averaging 49 TSG transects (black line) and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product.	75
55	Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product.	76

56	Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product.	77
57	Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product.	78
58	Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product.	79
59	Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product.	80
60	Density spectra (Top) calculated from averaging 49 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product.	81
61	Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product.	82
62	Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product.	83
63	Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product.	84
64	Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product.	85
65	Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product.	86
66	Density spectra (Top) calculated from averaging 49 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product.	87
67	Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC) Satellite product.	88

68	Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC) Satellite product (red line). 1 Overview

In this report, we present a systematic spectral analysis across 6 specific regions: the [North Atlantic](#), [Tropical Atlantic](#), [Tropical Pacific](#), [Arctic](#), [Southern Ocean](#), and [Western Pacific](#). This analysis compares well-sampled TSG lines with 26 satellite Sea Surface Salinity (SSS) products.

The methodology is detailed in [Section 2](#), while the TSG dataset is described in [Section 3](#).

For each satellite product, [Section 4](#) provides figures of the average density and coherence spectra between Satellite and TSG data for each region.

To keep this report concise, links to supplementary documents are included. These documents contain the power density spectra of Satellite and TSG data for individual TSG transects used in the averaging process.

[Section 5](#) consolidates the average density and coherence plots to facilitate a clearer comparison of results across satellite products for each region.

[Section 6](#) presents estimates of spectral slopes and effective resolutions for each satellite product and region.

We highly recommend using Acrobat Reader to visualize animated figures, which can be navigated using arrows between the plots and their captions.

2 Methodology

This report aims to evaluate the horizontal effective resolution of Sea Surface Salinity (SSS) and the coherency of mesoscale SSS features captured by satellite products. The approach follows the methodology proposed by [Boutin et al. \(2018\)](#), which involves computing the spectra and coherency spectra between TSG SSS and various satellite SSS products across 6 specific regions.

These regions were selected due to the exceptional availability of repeated transects. Each transect was visually inspected, and incomplete data were excluded. To minimize uncertainty caused by noise in individual spectra, the spectra were averaged within each region.

The horizontal SSS coherency spectra quantify the correlation of SSS horizontal variability between collocated TSG and satellite data. This metric assesses how well satellite products capture mesoscale features larger than 50 km while accounting for the impact of noise and spurious SSS contamination.

The coherency spectrum provides detailed insights into the linear correlation between TSG and satellite SSS signals across different wavelengths. Coherency values range from 0 to 1, where 1 indicates perfect correlation and 0 signifies no correlation. High coherency suggests that the TSG and satellite signals share significant information at a specific wavelength, while low coherency indicates minimal or no correlation at that scale.

The coherency spectrum is derived from the cross-spectral density between two signals $x(f)$ and $y(f)$ and their individual power spectral densities. It is given by:

$$C(f) = \frac{|S_{xy}(f)|^2}{S_{xx}(f)S_{yy}(f)} \quad (1)$$

where:

- x and y stand for TSG and satellite SSS signals, respectively.
- $S_{xy}(f)$ is the cross-spectral density of the signals x and y .
- $S_{xx}(f)$ and $S_{yy}(f)$ are the spectral densities of x and y respectively.

For each TSG transect, we apply the following processing steps:

- Calculate the cumulative distance along the TSG transect.
- Interpolate satellite data using a nearest-neighbor algorithm to preserve the TSG sampling rate and avoid smoothing. If multiple satellite maps are available during the transect period, the interpolation is performed in both space and time.
- Linearly interpolate TSG and satellite data onto a uniform grid with 1 km resolution to ensure accurate and reliable spectrum calculations.
- Linearly detrend both signals before calculating the density spectra and cross-spectra using Welch's averaged, modified periodogram method [Welch \(1967\)](#) with no overlap.
- For each region, average all spectra and cross-spectra before calculating the coherency spectra using Equation 1.

The resulting spectra are presented in Section 4 for each satellite product, and a comparison of the results between satellite products across the six regions is provided in Section 5.

Using the averaged spectra and coherency spectra, estimates of spectral slopes and effective resolution for each satellite product and region are detailed in Section 6.

3 TSG data

The TSG lines considered in this report correspond to sea surface salinity delayed mode data derived from voluntary observing ships collected, validated, archived, and made freely available by the [French Sea Surface Salinity Observation Service \(Alory et al. \(2015\)\)](#). The TSG SSS measurements have a spatial resolution of about 1-3 km along tracks. Only TSG data with quality flags of 1 and 2 are kept. Details of these TSG lines over the 6 specific regions ([North Atlantic](#), [Tropical Atlantic](#), [Tropical Pacific](#), [Arctic](#), [Southern Ocean](#) and [Western Pacific](#)) are briefly presented in the following subsections.

3.1 North Atlantic region

55 TSG transects (Figure 1) are available between 2010 and 2020 in the North Atlantic subtropical SSS maximum region (50° – 20° W, 10° – 40° N). The TSG data were collected by the Colibri (FNHO) and the Toucan (FNAV) using a water intake located at a depth of 5 m.

Figure 1: Scatter plot of the 55 TSG transects where the color represent the measured SSS.

3.2 Tropical Atlantic region

21 TSG transects (Figure 2) are available between 2014 and 2016 in the tropical Atlantic region (40° – 10° W, 5° – 20° N). The TSG data were gathered by the Cap San Lorenzo (LXSQ) using a water intake located at a depth of 10 m, and the Colibri (FNHO) with an intake at 5 m depth.

Figure 2: Scatter plot of the 21 TSG transects where the color represent the measured SSS.

3.3 Tropical Pacific region

29 TSG transects (Figure 3) are available between 2010 and 2021 in the tropical Pacific region (140° – 85° W, 13° S– 5° N). The TSG data were collected by the Matisse (5BAD2) and the Seatrade Blue (D5LS3) using a water intake located at a depth of 8 m and 9 m, respectively.

Figure 3: Scatter plot of the 29 TSG transects where the color represent the measured SSS.

3.4 Arctic region

29 TSG transects (Figure 4) are available between 2010 and 2016 in the Arctic region (140° – 85° W, 13° S– 5° N). The TSG data were collected by the Matisse (5BAD2) and the Seatrade Blue (D5LS3) using a water intake located at a depth of 8 m and 9 m, respectively.

Figure 4: Scatter plot of the 29 TSG transects where the color represent the measured SSS.

3.5 Southern Ocean region

62 TSG transects (Figure 5) are available between 2010 and 2024 in the Southern Ocean region (135°–150°E, 65°S–45°S). The TSG data were collected by the Astrolabe (FHZI/FASB) using a water intake located at a depth of 5 m.

Figure 5: Scatter plot of the 62 TSG transects where the color represent the measured SSS.

3.6 Western Pacific region

49 TSG transects (Figure 6) are available between 2014 and 2023 in the Western Pacific region (135°–180°E, 15°S–30°N). The TSG data were collected by the South Islander (3ENY2/7KAA), the Tropical Islander (3FLZ/3JYD), the Pacific Islander 2 (7KAC/HOWN) and the Coral Islander 2 (HORQ) using water intakes located at a depth of 8 m.

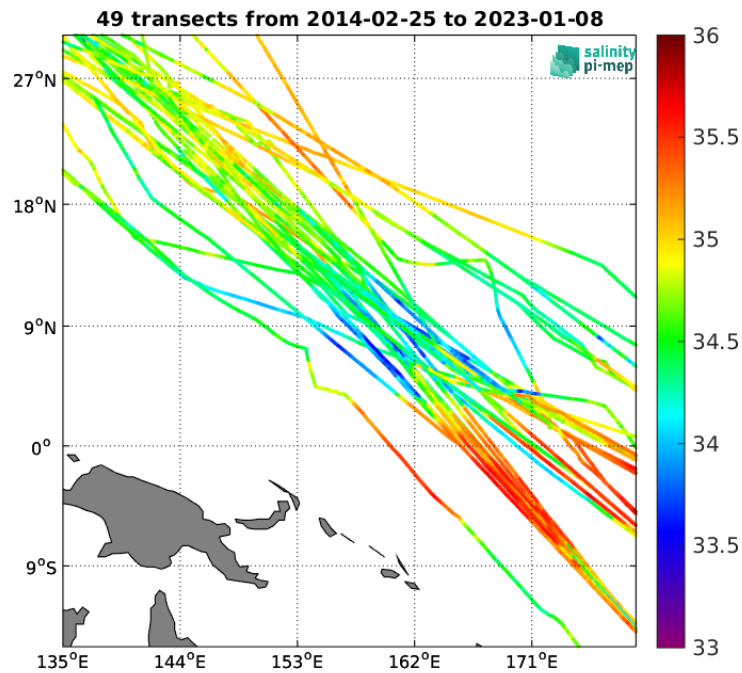

Figure 6: Scatter plot of the 49 TSG transects where the color represent the measured SSS.

4 Satellite products

The spectral analysis is available for the following 26 satellite SSS products:

- SMOS SSS L3 v332 - 9 Days (CATDS-CPDC)
- SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC)
- SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC)
- SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN)
- SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN)
- SMOS SSS L3 v2 - 9-Days (BEC)
- SMAP SSS L3 v6 - 8-Day running (RSS)
- SMAP SSS L3 v6 - Monthly (RSS)
- SMAP SSS L3 v5.0 - 8-Day running (JPL)
- SMAP SSS L3 v5.0 - Monthly (JPL)
- Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC)
- Aquarius SSS L3 OR v5 - Monthly (NASA-GSFC)
- Aquarius SSS L3 OR v5 - 7-Day running - Rain mask (NASA-GSFC)
- Aquarius SSS L3 OR v5 - Monthly - Rain mask (NASA-GSFC)
- Aquarius SSS L3 CAP v5 - 7-Day running (JPL)
- Aquarius SSS L3 CAP v5 - Monthly (JPL)
- SMOS SSS L4 OI v346 - Weekly (CMEMS-CATDS-LOPS)
- SMOS SSS L4 v1 - Daily (CMEMS-CNR)
- SMOS SSS L4 v1 - Monthly (CMEMS-CNR)

- CCI SSS L4 Merged-OI v4.41 - 7-day running (ESA)
- CCI SSS L4 Merged-OI v4.41 - 30-day running (ESA)
- SMAP SSS L4 OI v3 - Daily (ESR)
- SMAP SSS L4 OI v3 - Monthly (ESR)
- Aquarius SSS L4 OI v5 - Weekly (IPRC)
- Aquarius SSS L4 OI v5 - Monthly (IPRC)
- ISAS v7 - Monthly (Ifremer-LOPS-CMEMS)

4.1 SMOS SSS L3 v332 - 9 Days (CATDS-CPDC)

4.1.1 North Atlantic region

Figure 7 shows the average spectra (top panel) of the 55 TSG transects (black line) and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product.

Figure 7: Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_NAO_smos-l3-catds-cpdc-v332-9d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_NAO_smos-l3-catds-cpdc-v332-9d.nc](#).

4.1.2 Topical Atlantic region

Figure 8 shows the average spectra (top panel) of the 21 TSG transects (black line) and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product.

Figure 8: Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TAO-smos-l3-catds-cpdc-v332-9d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TAO-smos-l3-catds-cpdc-v332-9d.nc](#).

4.1.3 Tropical Pacific region

Figure 9 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product.

Figure 9: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TPO_smos-l3-catds-cpdc-v332-9d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TPO_smos-l3-catds-cpdc-v332-9d.nc](#).

4.1.4 Arctic region

Figure 10 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product.

Figure 10: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_ARCO_smos-l3-catds-cpdc-v332-9d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_ARCO_smos-l3-catds-cpdc-v332-9d.nc](#).

4.1.5 Southern Ocean region

Figure 11 shows the average spectra (top panel) of the 62 TSG transects (black line) and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product.

Figure 11: Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_SO_smos-l3-catds-cpdc-v332-9d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_SO_smos-l3-catds-cpdc-v332-9d.nc](#).

4.1.6 Western Pacific region

Figure 12 shows the average spectra (top panel) of the 49 TSG transects (black line) and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v332 - 9 Days (CATDS-CPDC) Satellite product.

Figure 15: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TPO_smos-l3-catds-cpdc-v335-10d-25km.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TPO_smos-l3-catds-cpdc-v335-10d-25km.nc](#).

4.2.4 Arctic region

Figure 16 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC) Satellite product.

Figure 16: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_ARCO_smos-l3-catds-cpdc-v335-10d-25km.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_ARCO_smos-l3-catds-cpdc-v335-10d-25km.nc](#).

4.2.5 Southern Ocean region

Figure 17 shows the average spectra (top panel) of the 62 TSG transects (black line) and collocated SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC) Satellite product.

Figure 17: Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_SO_smos-l3-catds-cpdc-v335-10d-25km.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_SO_smos-l3-catds-cpdc-v335-10d-25km.nc](#).

4.2.6 Western Pacific region

Figure 18 shows the average spectra (top panel) of the 49 TSG transects (black line) and collocated SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC) Satellite product.

Figure 18: Density spectra (Top) calculated from averaging 49 TSG transects (black line) and collocated SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v335 - 10 Days - 25 km (CATDS-CPDC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_WPO_smos-l3-catds-cpdc-v335-10d-25km.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_WPO_smos-l3-catds-cpdc-v335-10d-25km.nc](#).

4.3 SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC)

4.3.1 North Atlantic region

Figure 19 shows the average spectra (top panel) of the 55 TSG transects (black line) and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product.

Figure 19: Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_NAO_smos-l3-catds-cpdc-v335-1m-25km.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_NAO_smos-l3-catds-cpdc-v335-1m-25km.nc](#).

4.3.2 Topical Atlantic region

Figure 20 shows the average spectra (top panel) of the 21 TSG transects (black line) and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product.

Figure 20: Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TAO-smos-l3-catds-cpdc-v335-1m-25km.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TAO-smos-l3-catds-cpdc-v335-1m-25km.nc](#).

4.3.3 Tropical Pacific region

Figure 21 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product.

Figure 21: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TPO-smos-l3-catds-cpdc-v335-1m-25km.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TPO-smos-l3-catds-cpdc-v335-1m-25km.nc](#).

4.3.4 Arctic region

Figure 22 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product.

Figure 22: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_ARCO_smos-l3-catds-cpdc-v335-1m-25km.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_ARCO_smos-l3-catds-cpdc-v335-1m-25km.nc](#).

4.3.5 Southern Ocean region

Figure 23 shows the average spectra (top panel) of the 62 TSG transects (black line) and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product.

Figure 23: Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_SO_smos-l3-catds-cpdc-v335-1m-25km.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_SO_smos-l3-catds-cpdc-v335-1m-25km.nc](#).

4.3.6 Western Pacific region

Figure 24 shows the average spectra (top panel) of the 49 TSG transects (black line) and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product.

Figure 24: Density spectra (Top) calculated from averaging 49 TSG transects (black line) and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v335 - Monthly - 25 km (CATDS-CPDC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_WPO_smos-l3-catds-cpdc-v335-1m-25km.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_WPO_smos-l3-catds-cpdc-v335-1m-25km.nc](#).

4.4 SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN)

4.4.1 North Atlantic region

Figure 25 shows the average spectra (top panel) of the 55 TSG transects (black line) and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product.

Figure 25: Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_NAO-smos-l3-catds-locean-v9-9d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_NAO-smos-l3-catds-locean-v9-9d.nc](#).

4.4.2 Topical Atlantic region

Figure 26 shows the average spectra (top panel) of the 21 TSG transects (black line) and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product.

Figure 26: Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TAO-smos-l3-catds-locean-v9-9d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TAO-smos-l3-catds-locean-v9-9d.nc](#).

4.4.3 Tropical Pacific region

Figure 27 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product.

Figure 27: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TPO_smos-l3-catds-locean-v9-9d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TPO_smos-l3-catds-locean-v9-9d.nc](#).

4.4.4 Arctic region

Figure 28 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product.

Figure 28: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_ARCO_smos-l3-catds-locean-v9-9d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_ARCO_smos-l3-catds-locean-v9-9d.nc](#).

4.4.5 Southern Ocean region

Figure 29 shows the average spectra (top panel) of the 62 TSG transects (black line) and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product.

Figure 29: Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_SO_smos-l3-catds-locean-v9-9d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_SO_smos-l3-catds-locean-v9-9d.nc](#).

4.4.6 Western Pacific region

Figure 30 shows the average spectra (top panel) of the 49 TSG transects (black line) and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product.

Figure 30: Density spectra (Top) calculated from averaging 49 TSG transects (black line) and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v9 - 9 Days (CATDS-CEC-LOCEAN) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_WPO_smos-l3-catds-locean-v9-9d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_WPO_smos-l3-catds-locean-v9-9d.nc](#).

4.5 SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN)

4.5.1 North Atlantic region

Figure 31 shows the average spectra (top panel) of the 55 TSG transects (black line) and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product.

Figure 31: Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_NAO_smos-l3-catds-locean-v9-18d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_NAO_smos-l3-catds-locean-v9-18d.nc](#).

4.5.2 Topical Atlantic region

Figure 32 shows the average spectra (top panel) of the 21 TSG transects (black line) and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product.

Figure 32: Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TAO_smos-l3-catds-locean-v9-18d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TAO_smos-l3-catds-locean-v9-18d.nc](#).

4.5.3 Tropical Pacific region

Figure 33 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product.

Figure 33: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product (red line). Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TPO_smos-l3-catds-locean-v9-18d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TPO_smos-l3-catds-locean-v9-18d.nc](#).

4.5.4 Arctic region

Figure 34 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product.

Figure 34: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_ARCO_smos-l3-catds-locean-v9-18d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_ARCO_smos-l3-catds-locean-v9-18d.nc](#).

4.5.5 Southern Ocean region

Figure 35 shows the average spectra (top panel) of the 62 TSG transects (black line) and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product.

Figure 35: Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_SO_smos-l3-catds-locean-v9-18d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_SO_smos-l3-catds-locean-v9-18d.nc](#).

4.5.6 Western Pacific region

Figure 36 shows the average spectra (top panel) of the 49 TSG transects (black line) and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product.

Figure 36: Density spectra (Top) calculated from averaging 49 TSG transects (black line) and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v9 - 18 Days (CATDS-CEC-LOCEAN) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_WPO_smos-l3-catds-locean-v9-18d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_WPO_smos-l3-catds-locean-v9-18d.nc](#).

4.6 SMOS SSS L3 v2 - 9-Days (BEC)

4.6.1 North Atlantic region

Figure 37 shows the average spectra (top panel) of the 55 TSG transects (black line) and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product.

Figure 37: Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_NAO_smos-l3-bec-v2-9d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_NAO_smos-l3-bec-v2-9d.nc](#).

4.6.2 Topical Atlantic region

Figure 38 shows the average spectra (top panel) of the 21 TSG transects (black line) and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product.

Figure 38: Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TAO_smos-l3-bec-v2-9d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TAO_smos-l3-bec-v2-9d.nc](#).

4.6.3 Tropical Pacific region

Figure 39 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product.

Figure 39: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TPO_smos-l3-bec-v2-9d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TPO_smos-l3-bec-v2-9d.nc](#).

4.6.4 Arctic region

Figure 40 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product.

Figure 40: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_ARCO_smos-l3-bec-v2-9d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_ARCO_smos-l3-bec-v2-9d.nc](#).

4.6.5 Southern Ocean region

Figure 41 shows the average spectra (top panel) of the 62 TSG transects (black line) and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product.

Figure 41: Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_SO_smos-l3-bec-v2-9d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_SO_smos-l3-bec-v2-9d.nc](#).

4.6.6 Western Pacific region

Figure 42 shows the average spectra (top panel) of the 49 TSG transects (black line) and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product.

Figure 42: Density spectra (Top) calculated from averaging 49 TSG transects (black line) and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L3 v2 - 9-Days (BEC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_WPO_smos-l3-bec-v2-9d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_WPO_smos-l3-bec-v2-9d.nc](#).

4.7 SMAP SSS L3 v6 - 8-Day running (RSS)

4.7.1 North Atlantic region

Figure 43 shows the average spectra (top panel) of the 55 TSG transects (black line) and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product.

Figure 43: Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_NAO_smmap-l3-rss-v6-8dr.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_NAO_smmap-l3-rss-v6-8dr.nc](#).

4.7.2 Topical Atlantic region

Figure 44 shows the average spectra (top panel) of the 21 TSG transects (black line) and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product.

Figure 44: Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TAO_smmap-l3-rss-v6-8dr.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TAO_smmap-l3-rss-v6-8dr.nc](#).

4.7.3 Tropical Pacific region

Figure 45 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product.

Figure 45: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TPO_smmap-l3-rss-v6-8dr.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TPO_smmap-l3-rss-v6-8dr.nc](#).

4.7.4 Arctic region

Figure 46 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product.

Figure 46: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_ARCO_smmap-l3-rss-v6-8dr.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_ARCO_smmap-l3-rss-v6-8dr.nc](#).

4.7.5 Southern Ocean region

Figure 47 shows the average spectra (top panel) of the 62 TSG transects (black line) and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product.

Figure 47: Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_SO_smap-l3-rss-v6-8dr.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_SO_smap-l3-rss-v6-8dr.nc](#).

4.7.6 Western Pacific region

Figure 48 shows the average spectra (top panel) of the 49 TSG transects (black line) and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product.

Figure 48: Density spectra (Top) calculated from averaging 49 TSG transects (black line) and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v6 - 8-Day running (RSS) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_WPO_smmap-l3-rss-v6-8dr.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_WPO_smmap-l3-rss-v6-8dr.nc](#).

4.8 SMAP SSS L3 v6 - Monthly (RSS)

4.8.1 North Atlantic region

Figure 49 shows the average spectra (top panel) of the 55 TSG transects (black line) and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product.

Figure 49: Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_NAO_smap-l3-rss-v6-1m.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_NAO_smap-l3-rss-v6-1m.nc](#).

4.8.2 Topical Atlantic region

Figure 50 shows the average spectra (top panel) of the 21 TSG transects (black line) and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product.

Figure 50: Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TAO_smmap-l3-rss-v6-1m.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TAO_smmap-l3-rss-v6-1m.nc](#).

4.8.3 Tropical Pacific region

Figure 51 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product.

Figure 51: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TPO_smmap-l3-rss-v6-1m.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TPO_smmap-l3-rss-v6-1m.nc](#).

4.8.4 Arctic region

Figure 52 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product.

Figure 52: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_ARCO_smap-l3-rss-v6-1m.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_ARCO_smap-l3-rss-v6-1m.nc](#).

4.8.5 Southern Ocean region

Figure 53 shows the average spectra (top panel) of the 62 TSG transects (black line) and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product.

Figure 53: Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_SO_smap-l3-rss-v6-1m.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_SO_smap-l3-rss-v6-1m.nc](#).

4.8.6 Western Pacific region

Figure 54 shows the average spectra (top panel) of the 49 TSG transects (black line) and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product.

Figure 54: Density spectra (Top) calculated from averaging 49 TSG transects (black line) and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v6 - Monthly (RSS) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_WPO_smmap-l3-rss-v6-1m.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_WPO_smmap-l3-rss-v6-1m.nc](#).

4.9 SMAP SSS L3 v5.0 - 8-Day running (JPL)

4.9.1 North Atlantic region

Figure 55 shows the average spectra (top panel) of the 55 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product.

Figure 55: Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_NAO_smmap-l3-jpl-v5.0-8dr.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_NAO_smmap-l3-jpl-v5.0-8dr.nc](#).

4.9.2 Topical Atlantic region

Figure 56 shows the average spectra (top panel) of the 21 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product.

Figure 56: Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TAO_smmap-l3-jpl-v5.0-8dr.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TAO_smmap-l3-jpl-v5.0-8dr.nc](#).

4.9.3 Tropical Pacific region

Figure 57 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product.

Figure 57: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_ARCO_smmap-l3-jpl-v5.0-8dr.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_ARCO_smmap-l3-jpl-v5.0-8dr.nc](#).

4.9.5 Southern Ocean region

Figure 59 shows the average spectra (top panel) of the 62 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product.

Figure 59: Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_SO_smap-l3-jpl-v5.0-8dr.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_SO_smap-l3-jpl-v5.0-8dr.nc](#).

4.9.6 Western Pacific region

Figure 60 shows the average spectra (top panel) of the 49 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product.

Figure 60: Density spectra (Top) calculated from averaging 49 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v5.0 - 8-Day running (JPL) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_WPO_smmap-l3-jpl-v5.0-8dr.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_WPO_smmap-l3-jpl-v5.0-8dr.nc](#).

4.10 SMAP SSS L3 v5.0 - Monthly (JPL)

4.10.1 North Atlantic region

Figure 61 shows the average spectra (top panel) of the 55 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product.

Figure 61: Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_NAO_smmap-l3-jpl-v5.0-1m.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_NAO_smmap-l3-jpl-v5.0-1m.nc](#).

4.10.2 Topical Atlantic region

Figure 62 shows the average spectra (top panel) of the 21 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product.

Figure 62: Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TAO_smmap-l3-jpl-v5.0-1m.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TAO_smmap-l3-jpl-v5.0-1m.nc](#).

4.10.3 Tropical Pacific region

Figure 63 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product.

Figure 63: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TPO_smmap-l3-jpl-v5.0-1m.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TPO_smmap-l3-jpl-v5.0-1m.nc](#).

4.10.4 Arctic region

Figure 64 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product.

Figure 64: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_ARCO_smmap-l3-jpl-v5.0-1m.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_ARCO_smmap-l3-jpl-v5.0-1m.nc](#).

4.10.5 Southern Ocean region

Figure 65 shows the average spectra (top panel) of the 62 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product.

Figure 65: Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_SO_smap-l3-jpl-v5.0-1m.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_SO_smap-l3-jpl-v5.0-1m.nc](#).

4.10.6 Western Pacific region

Figure 66 shows the average spectra (top panel) of the 49 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product.

Figure 66: Density spectra (Top) calculated from averaging 49 TSG transects (black line) and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L3 v5.0 - Monthly (JPL) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_WPO_smmap-l3-jpl-v5.0-1m.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_WPO_smmap-l3-jpl-v5.0-1m.nc](#).

4.11 Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC)

4.11.1 North Atlantic region

Figure 67 shows the average spectra (top panel) of the 55 TSG transects (black line) and collocated Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC) Satellite product.

Figure 67: Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_NAO_aquarius-l3-or-v5-7dr.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_NAO_aquarius-l3-or-v5-7dr.nc](#).

4.11.2 Topical Atlantic region

Figure 68 shows the average spectra (top panel) of the 21 TSG transects (black line) and collocated Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC) Satellite product.

Figure 68: Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TAO_aquarius-l3-or-v5-7dr.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TAO_aquarius-l3-or-v5-7dr.nc](#).

4.11.3 Tropical Pacific region

Figure 69 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC) Satellite product.

Figure 69: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TPO_aquarius-l3-or-v5-7dr.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TPO_aquarius-l3-or-v5-7dr.nc](#).

4.11.4 Arctic region

Figure 70 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC) Satellite product.

Figure 70: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_ARCO_aquarius-l3-or-v5-7dr.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_ARCO_aquarius-l3-or-v5-7dr.nc](#).

4.11.5 Southern Ocean region

Figure 71 shows the average spectra (top panel) of the 62 TSG transects (black line) and collocated Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC) Satellite product.

Figure 71: Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_SO_aquarius-l3-or-v5-7dr.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_SO_aquarius-l3-or-v5-7dr.nc](#).

4.11.6 Western Pacific region

Figure 72 shows the average spectra (top panel) of the 49 TSG transects (black line) and collocated Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC) Satellite product.

Figure 72: Density spectra (Top) calculated from averaging 49 TSG transects (black line) and collocated Aquarius SSS L3 OR v5 - 7-Day running (NASA-GSFC) Satellite product (red line). Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_WPO_aquarius-l3-or-v5-7dr-rain-mask.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_WPO_aquarius-l3-or-v5-7dr-rain-mask.nc](#).

4.14 Aquarius SSS L3 OR v5 - Monthly - Rain mask (NASA-GSFC)

4.14.1 North Atlantic region

Figure 85 shows the average spectra (top panel) of the 55 TSG transects (black line) and collocated Aquarius SSS L3 OR v5 - Monthly - Rain mask (NASA-GSFC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated Aquarius SSS L3 OR v5 - Monthly - Rain mask (NASA-GSFC) Satellite product.

Figure 85: Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated Aquarius SSS L3 OR v5 - Monthly - Rain mask (NASA-GSFC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated Aquarius SSS L3 OR v5 - Monthly - Rain mask (NASA-GSFC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_NAO_aquarius-l3-or-v5-1m-rain-mask.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_NAO_aquarius-l3-or-v5-1m-rain-mask.nc](#).

4.14.2 Topical Atlantic region

Figure 86 shows the average spectra (top panel) of the 21 TSG transects (black line) and collocated Aquarius SSS L3 OR v5 - Monthly - Rain mask (NASA-GSFC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated Aquarius SSS L3 OR v5 - Monthly - Rain mask (NASA-GSFC) Satellite product.

Figure 86: Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated Aquarius SSS L3 OR v5 - Monthly - Rain mask (NASA-GSFC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated Aquarius SSS L3 OR v5 - Monthly - Rain mask (NASA-GSFC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TAO_aquarius-l3-or-v5-1m-rain-mask.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TAO_aquarius-l3-or-v5-1m-rain-mask.nc](#).

4.14.3 Tropical Pacific region

Figure 87 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated Aquarius SSS L3 OR v5 - Monthly - Rain mask (NASA-GSFC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated Aquarius SSS L3 OR v5 - Monthly - Rain mask (NASA-GSFC) Satellite product.

Figure 87: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated Aquarius SSS L3 OR v5 - Monthly - Rain mask (NASA-GSFC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated Aquarius SSS L3 OR v5 - Monthly - Rain mask (NASA-GSFC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TPO_aquarius-l3-or-v5-1m-rain-mask.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TPO_aquarius-l3-or-v5-1m-rain-mask.nc](#).

4.14.4 Arctic region

Figure 88 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated Aquarius SSS L3 OR v5 - Monthly - Rain mask (NASA-GSFC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated Aquarius SSS L3 OR v5 - Monthly - Rain mask (NASA-GSFC) Satellite product.

Figure 88: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated Aquarius SSS L3 OR v5 - Monthly - Rain mask (NASA-GSFC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated Aquarius SSS L3 OR v5 - Monthly - Rain mask (NASA-GSFC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_ARCO_aquarius-l3-or-v5-1m-rain-mask.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_ARCO_aquarius-l3-or-v5-1m-rain-mask.nc](#).

4.14.5 Southern Ocean region

Figure 89 shows the average spectra (top panel) of the 62 TSG transects (black line) and collocated Aquarius SSS L3 OR v5 - Monthly - Rain mask (NASA-GSFC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated Aquarius SSS L3 OR v5 - Monthly - Rain mask (NASA-GSFC) Satellite product.

Figure 89: Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated Aquarius SSS L3 OR v5 - Monthly - Rain mask (NASA-GSFC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated Aquarius SSS L3 OR v5 - Monthly - Rain mask (NASA-GSFC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_SO_aquarius-l3-or-v5-1m-rain-mask.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_SO_aquarius-l3-or-v5-1m-rain-mask.nc](#).

4.14.6 Western Pacific region

Figure 90 shows the average spectra (top panel) of the 49 TSG transects (black line) and collocated Aquarius SSS L3 OR v5 - Monthly - Rain mask (NASA-GSFC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated Aquarius SSS L3 OR v5 - Monthly - Rain mask (NASA-GSFC) Satellite product.

Figure 90: Density spectra (Top) calculated from averaging 49 TSG transects (black line) and collocated Aquarius SSS L3 OR v5 - Monthly - Rain mask (NASA-GSFC) Satellite product (red line). Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_WPO_smos-l4-cmems-catds-lops-oi-v346-1w.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_WPO_smos-l4-cmems-catds-lops-oi-v346-1w.nc](#).

4.18 SMOS SSS L4 v1 - Daily (CMEMS-CNR)

4.18.1 North Atlantic region

Figure 109 shows the average spectra (top panel) of the 55 TSG transects (black line) and collocated SMOS SSS L4 v1 - Daily (CMEMS-CNR) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L4 v1 - Daily (CMEMS-CNR) Satellite product.

Figure 109: Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated SMOS SSS L4 v1 - Daily (CMEMS-CNR) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L4 v1 - Daily (CMEMS-CNR) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_NAO_smos-l4-cmems-cnr-v1-1d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_NAO_smos-l4-cmems-cnr-v1-1d.nc](#).

4.18.2 Topical Atlantic region

Figure 110 shows the average spectra (top panel) of the 21 TSG transects (black line) and collocated SMOS SSS L4 v1 - Daily (CMEMS-CNR) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L4 v1 - Daily (CMEMS-CNR) Satellite product.

Figure 110: Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated SMOS SSS L4 v1 - Daily (CMEMS-CNR) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L4 v1 - Daily (CMEMS-CNR) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TAO_smos-l4-cmems-cnr-v1-1d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TAO_smos-l4-cmems-cnr-v1-1d.nc](#).

4.18.3 Tropical Pacific region

Figure 111 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated SMOS SSS L4 v1 - Daily (CMEMS-CNR) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L4 v1 - Daily (CMEMS-CNR) Satellite product.

Figure 111: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L4 v1 - Daily (CMEMS-CNR) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L4 v1 - Daily (CMEMS-CNR) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TPO_smos-l4-cmems-cnr-v1-1d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TPO_smos-l4-cmems-cnr-v1-1d.nc](#).

4.18.4 Arctic region

Figure 112 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated SMOS SSS L4 v1 - Daily (CMEMS-CNR) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L4 v1 - Daily (CMEMS-CNR) Satellite product.

Figure 112: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L4 v1 - Daily (CMEMS-CNR) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L4 v1 - Daily (CMEMS-CNR) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_ARCO_smos-l4-cmems-cnr-v1-1d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_ARCO_smos-l4-cmems-cnr-v1-1d.nc](#).

4.18.5 Southern Ocean region

Figure 113 shows the average spectra (top panel) of the 62 TSG transects (black line) and collocated SMOS SSS L4 v1 - Daily (CMEMS-CNR) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L4 v1 - Daily (CMEMS-CNR) Satellite product.

Figure 113: Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated SMOS SSS L4 v1 - Daily (CMEMS-CNR) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L4 v1 - Daily (CMEMS-CNR) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_SO_smos-l4-cmems-cnr-v1-1d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_SO_smos-l4-cmems-cnr-v1-1d.nc](#).

4.18.6 Western Pacific region

Figure 114 shows the average spectra (top panel) of the 49 TSG transects (black line) and collocated SMOS SSS L4 v1 - Daily (CMEMS-CNR) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L4 v1 - Daily (CMEMS-CNR) Satellite product.

Figure 114: Density spectra (Top) calculated from averaging 49 TSG transects (black line) and collocated SMOS SSS L4 v1 - Daily (CMEMS-CNR) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L4 v1 - Daily (CMEMS-CNR) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_WPO_smos-l4-cmems-cnr-v1-1d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_WPO_smos-l4-cmems-cnr-v1-1d.nc](#).

4.19 SMOS SSS L4 v1 - Monthly (CMEMS-CNR)

4.19.1 North Atlantic region

Figure 115 shows the average spectra (top panel) of the 55 TSG transects (black line) and collocated SMOS SSS L4 v1 - Monthly (CMEMS-CNR) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L4 v1 - Monthly (CMEMS-CNR) Satellite product.

Figure 115: Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated SMOS SSS L4 v1 - Monthly (CMEMS-CNR) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L4 v1 - Monthly (CMEMS-CNR) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_NAO_smos-l4-cmems-cnr-v1-1m.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_NAO_smos-l4-cmems-cnr-v1-1m.nc](#).

4.19.2 Topical Atlantic region

Figure 116 shows the average spectra (top panel) of the 21 TSG transects (black line) and collocated SMOS SSS L4 v1 - Monthly (CMEMS-CNR) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L4 v1 - Monthly (CMEMS-CNR) Satellite product.

Figure 116: Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated SMOS SSS L4 v1 - Monthly (CMEMS-CNR) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L4 v1 - Monthly (CMEMS-CNR) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TAO_smos-l4-cmems-cnr-v1-1m.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TAO_smos-l4-cmems-cnr-v1-1m.nc](#).

4.19.3 Tropical Pacific region

Figure 117 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated SMOS SSS L4 v1 - Monthly (CMEMS-CNR) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L4 v1 - Monthly (CMEMS-CNR) Satellite product.

Figure 117: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L4 v1 - Monthly (CMEMS-CNR) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L4 v1 - Monthly (CMEMS-CNR) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TPO_sm0s-l4-cmems-cnr-v1-1m.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TPO_sm0s-l4-cmems-cnr-v1-1m.nc](#).

4.19.4 Arctic region

Figure 118 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated SMOS SSS L4 v1 - Monthly (CMEMS-CNR) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L4 v1 - Monthly (CMEMS-CNR) Satellite product.

Figure 118: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMOS SSS L4 v1 - Monthly (CMEMS-CNR) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L4 v1 - Monthly (CMEMS-CNR) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_ARCO_smos-l4-cmems-cnr-v1-1m.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_ARCO_smos-l4-cmems-cnr-v1-1m.nc](#).

4.19.5 Southern Ocean region

Figure 119 shows the average spectra (top panel) of the 62 TSG transects (black line) and collocated SMOS SSS L4 v1 - Monthly (CMEMS-CNR) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L4 v1 - Monthly (CMEMS-CNR) Satellite product.

Figure 119: Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated SMOS SSS L4 v1 - Monthly (CMEMS-CNR) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMOS SSS L4 v1 - Monthly (CMEMS-CNR) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_SO_smos-l4-cmems-cnr-v1-1m.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_SO_smos-l4-cmems-cnr-v1-1m.nc](#).

4.19.6 Western Pacific region

Figure 120 shows the average spectra (top panel) of the 49 TSG transects (black line) and collocated SMOS SSS L4 v1 - Monthly (CMEMS-CNR) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMOS SSS L4 v1 - Monthly (CMEMS-CNR) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_NAO_cci-l4-esa-merged-oi-v4.41-30dr.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_NAO_cci-l4-esa-merged-oi-v4.41-30dr.nc](#).

4.21.2 Topical Atlantic region

Figure 128 shows the average spectra (top panel) of the 21 TSG transects (black line) and collocated CCI SSS L4 Merged-OI v4.41 - 30-day running (ESA) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated CCI SSS L4 Merged-OI v4.41 - 30-day running (ESA) Satellite product.

Figure 128: Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated CCI SSS L4 Merged-OI v4.41 - 30-day running (ESA) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated CCI SSS L4 Merged-OI v4.41 - 30-day running (ESA) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TAO_cci-l4-esa-merged-oi-v4.41-30dr.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TAO_cci-l4-esa-merged-oi-v4.41-30dr.nc](#).

4.21.3 Tropical Pacific region

Figure 129 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated CCI SSS L4 Merged-OI v4.41 - 30-day running (ESA) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated CCI SSS L4 Merged-OI v4.41 - 30-day running (ESA) Satellite product.

Figure 129: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated CCI SSS L4 Merged-OI v4.41 - 30-day running (ESA) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated CCI SSS L4 Merged-OI v4.41 - 30-day running (ESA) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TPO_cci-l4-esa-merged-oi-v4.41-30dr.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TPO_cci-l4-esa-merged-oi-v4.41-30dr.nc](#).

4.21.4 Arctic region

Figure 130 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated CCI SSS L4 Merged-OI v4.41 - 30-day running (ESA) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated CCI SSS L4 Merged-OI v4.41 - 30-day running (ESA) Satellite product.

Figure 130: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated CCI SSS L4 Merged-OI v4.41 - 30-day running (ESA) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated CCI SSS L4 Merged-OI v4.41 - 30-day running (ESA) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_ARCO_cci-l4-esa-merged-oi-v4.41-30dr.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_ARCO_cci-l4-esa-merged-oi-v4.41-30dr.nc](#).

4.21.5 Southern Ocean region

Figure 131 shows the average spectra (top panel) of the 62 TSG transects (black line) and collocated CCI SSS L4 Merged-OI v4.41 - 30-day running (ESA) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated CCI SSS L4 Merged-OI v4.41 - 30-day running (ESA) Satellite product.

Figure 131: Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated CCI SSS L4 Merged-OI v4.41 - 30-day running (ESA) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated CCI SSS L4 Merged-OI v4.41 - 30-day running (ESA) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_SO_cci-l4-esa-merged-oi-v4.41-30dr.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_SO_cci-l4-esa-merged-oi-v4.41-30dr.nc](#).

4.21.6 Western Pacific region

Figure 132 shows the average spectra (top panel) of the 49 TSG transects (black line) and collocated CCI SSS L4 Merged-OI v4.41 - 30-day running (ESA) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated CCI SSS L4 Merged-OI v4.41 - 30-day running (ESA) Satellite product.

Figure 132: Density spectra (Top) calculated from averaging 49 TSG transects (black line) and collocated CCI SSS L4 Merged-OI v4.41 - 30-day running (ESA) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated CCI SSS L4 Merged-OI v4.41 - 30-day running (ESA) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_WPO_cci-l4-esa-merged-oi-v4.41-30dr.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_WPO_cci-l4-esa-merged-oi-v4.41-30dr.nc](#).

4.22 SMAP SSS L4 OI v3 - Daily (ESR)

4.22.1 North Atlantic region

Figure 133 shows the average spectra (top panel) of the 55 TSG transects (black line) and collocated SMAP SSS L4 OI v3 - Daily (ESR) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L4 OI v3 - Daily (ESR) Satellite product.

Figure 133: Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated SMAP SSS L4 OI v3 - Daily (ESR) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L4 OI v3 - Daily (ESR) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_NAO_smap-l4-esr-oi-v3-1d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_NAO_smap-l4-esr-oi-v3-1d.nc](#).

4.22.2 Topical Atlantic region

Figure 134 shows the average spectra (top panel) of the 21 TSG transects (black line) and collocated SMAP SSS L4 OI v3 - Daily (ESR) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L4 OI v3 - Daily (ESR) Satellite product.

Figure 134: Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated SMAP SSS L4 OI v3 - Daily (ESR) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L4 OI v3 - Daily (ESR) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TAO_smmap-l4-esr-oi-v3-1d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TAO_smmap-l4-esr-oi-v3-1d.nc](#).

4.22.3 Tropical Pacific region

Figure 135 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated SMAP SSS L4 OI v3 - Daily (ESR) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L4 OI v3 - Daily (ESR) Satellite product.

Figure 135: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMAP SSS L4 OI v3 - Daily (ESR) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L4 OI v3 - Daily (ESR) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TPO_smmap-l4-esr-oi-v3-1d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TPO_smmap-l4-esr-oi-v3-1d.nc](#).

4.22.4 Arctic region

Figure 136 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated SMAP SSS L4 OI v3 - Daily (ESR) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L4 OI v3 - Daily (ESR) Satellite product.

Figure 136: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMAP SSS L4 OI v3 - Daily (ESR) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L4 OI v3 - Daily (ESR) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_ARCO_smmap-l4-esr-oi-v3-1d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_ARCO_smmap-l4-esr-oi-v3-1d.nc](#).

4.22.5 Southern Ocean region

Figure 137 shows the average spectra (top panel) of the 62 TSG transects (black line) and collocated SMAP SSS L4 OI v3 - Daily (ESR) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L4 OI v3 - Daily (ESR) Satellite product.

Figure 137: Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated SMAP SSS L4 OI v3 - Daily (ESR) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L4 OI v3 - Daily (ESR) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_SO_smap-l4-esr-oi-v3-1d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_SO_smap-l4-esr-oi-v3-1d.nc](#).

4.22.6 Western Pacific region

Figure 138 shows the average spectra (top panel) of the 49 TSG transects (black line) and collocated SMAP SSS L4 OI v3 - Daily (ESR) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L4 OI v3 - Daily (ESR) Satellite product.

Figure 138: Density spectra (Top) calculated from averaging 49 TSG transects (black line) and collocated SMAP SSS L4 OI v3 - Daily (ESR) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L4 OI v3 - Daily (ESR) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_WPO_smmap-l4-esr-oi-v3-1d.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_WPO_smmap-l4-esr-oi-v3-1d.nc](#).

4.23 SMAP SSS L4 OI v3 - Monthly (ESR)

4.23.1 North Atlantic region

Figure 139 shows the average spectra (top panel) of the 55 TSG transects (black line) and collocated SMAP SSS L4 OI v3 - Monthly (ESR) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L4 OI v3 - Monthly (ESR) Satellite product.

Figure 139: Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated SMAP SSS L4 OI v3 - Monthly (ESR) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L4 OI v3 - Monthly (ESR) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_NAO_smap-l4-esr-oi-v3-1m.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_NAO_smap-l4-esr-oi-v3-1m.nc](#).

4.23.2 Topical Atlantic region

Figure 140 shows the average spectra (top panel) of the 21 TSG transects (black line) and collocated SMAP SSS L4 OI v3 - Monthly (ESR) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L4 OI v3 - Monthly (ESR) Satellite product.

Figure 140: Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated SMAP SSS L4 OI v3 - Monthly (ESR) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L4 OI v3 - Monthly (ESR) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TAO_smmap-l4-esr-oi-v3-1m.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TAO_smmap-l4-esr-oi-v3-1m.nc](#).

4.23.3 Tropical Pacific region

Figure 141 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated SMAP SSS L4 OI v3 - Monthly (ESR) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L4 OI v3 - Monthly (ESR) Satellite product.

Figure 141: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMAP SSS L4 OI v3 - Monthly (ESR) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L4 OI v3 - Monthly (ESR) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TPO_smmap-l4-esr-oi-v3-1m.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TPO_smmap-l4-esr-oi-v3-1m.nc](#).

4.23.4 Arctic region

Figure 142 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated SMAP SSS L4 OI v3 - Monthly (ESR) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L4 OI v3 - Monthly (ESR) Satellite product.

Figure 142: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated SMAP SSS L4 OI v3 - Monthly (ESR) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L4 OI v3 - Monthly (ESR) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_ARCO_smap-l4-esr-oi-v3-1m.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_ARCO_smap-l4-esr-oi-v3-1m.nc](#).

4.23.5 Southern Ocean region

Figure 143 shows the average spectra (top panel) of the 62 TSG transects (black line) and collocated SMAP SSS L4 OI v3 - Monthly (ESR) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L4 OI v3 - Monthly (ESR) Satellite product.

Figure 143: Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated SMAP SSS L4 OI v3 - Monthly (ESR) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L4 OI v3 - Monthly (ESR) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_SO_smap-l4-esr-oi-v3-1m.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_SO_smap-l4-esr-oi-v3-1m.nc](#).

4.23.6 Western Pacific region

Figure 144 shows the average spectra (top panel) of the 49 TSG transects (black line) and collocated SMAP SSS L4 OI v3 - Monthly (ESR) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated SMAP SSS L4 OI v3 - Monthly (ESR) Satellite product.

Figure 144: Density spectra (Top) calculated from averaging 49 TSG transects (black line) and collocated SMAP SSS L4 OI v3 - Monthly (ESR) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated SMAP SSS L4 OI v3 - Monthly (ESR) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_WPO_smmap-l4-esr-oi-v3-1m.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_WPO_smmap-l4-esr-oi-v3-1m.nc](#).

4.24 Aquarius SSS L4 OI v5 - Weekly (IPRC)

4.24.1 North Atlantic region

Figure 145 shows the average spectra (top panel) of the 55 TSG transects (black line) and collocated Aquarius SSS L4 OI v5 - Weekly (IPRC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated Aquarius SSS L4 OI v5 - Weekly (IPRC) Satellite product.

Figure 145: Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated Aquarius SSS L4 OI v5 - Weekly (IPRC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated Aquarius SSS L4 OI v5 - Weekly (IPRC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_NAO_aquarius-l4-iprc-v5-1w.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_NAO_aquarius-l4-iprc-v5-1w.nc](#).

4.24.2 Topical Atlantic region

Figure 146 shows the average spectra (top panel) of the 21 TSG transects (black line) and collocated Aquarius SSS L4 OI v5 - Weekly (IPRC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated Aquarius SSS L4 OI v5 - Weekly (IPRC) Satellite product.

Figure 146: Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated Aquarius SSS L4 OI v5 - Weekly (IPRC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated Aquarius SSS L4 OI v5 - Weekly (IPRC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TAO_aquarius-l4-iprc-v5-1w.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TAO_aquarius-l4-iprc-v5-1w.nc](#).

4.24.3 Tropical Pacific region

Figure 147 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated Aquarius SSS L4 OI v5 - Weekly (IPRC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated Aquarius SSS L4 OI v5 - Weekly (IPRC) Satellite product.

Figure 147: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated Aquarius SSS L4 OI v5 - Weekly (IPRC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated Aquarius SSS L4 OI v5 - Weekly (IPRC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_TPO_aquarius-l4-iprc-v5-1w.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_TPO_aquarius-l4-iprc-v5-1w.nc](#).

4.24.4 Arctic region

Figure 148 shows the average spectra (top panel) of the 29 TSG transects (black line) and collocated Aquarius SSS L4 OI v5 - Weekly (IPRC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated Aquarius SSS L4 OI v5 - Weekly (IPRC) Satellite product.

Figure 148: Density spectra (Top) calculated from averaging 29 TSG transects (black line) and collocated Aquarius SSS L4 OI v5 - Weekly (IPRC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated Aquarius SSS L4 OI v5 - Weekly (IPRC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_ARCO_aquarius-l4-iprc-v5-1w.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_ARCO_aquarius-l4-iprc-v5-1w.nc](#).

4.24.5 Southern Ocean region

Figure 149 shows the average spectra (top panel) of the 62 TSG transects (black line) and collocated Aquarius SSS L4 OI v5 - Weekly (IPRC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated Aquarius SSS L4 OI v5 - Weekly (IPRC) Satellite product.

Figure 149: Density spectra (Top) calculated from averaging 62 TSG transects (black line) and collocated Aquarius SSS L4 OI v5 - Weekly (IPRC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated Aquarius SSS L4 OI v5 - Weekly (IPRC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_SO_aquarius-l4-iprc-v5-1w.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_SO_aquarius-l4-iprc-v5-1w.nc](#).

4.24.6 Western Pacific region

Figure 150 shows the average spectra (top panel) of the 49 TSG transects (black line) and collocated Aquarius SSS L4 OI v5 - Weekly (IPRC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated Aquarius SSS L4 OI v5 - Weekly (IPRC) Satellite product.

Figure 150: Density spectra (Top) calculated from averaging 49 TSG transects (black line) and collocated Aquarius SSS L4 OI v5 - Weekly (IPRC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated Aquarius SSS L4 OI v5 - Weekly (IPRC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_WPO_aquarius-l4-iprc-v5-1w.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_WPO_aquarius-l4-iprc-v5-1w.nc](#).

4.25 Aquarius SSS L4 OI v5 - Monthly (IPRC)

4.25.1 North Atlantic region

Figure 151 shows the average spectra (top panel) of the 55 TSG transects (black line) and collocated Aquarius SSS L4 OI v5 - Monthly (IPRC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated Aquarius SSS L4 OI v5 - Monthly (IPRC) Satellite product.

Figure 151: Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated Aquarius SSS L4 OI v5 - Monthly (IPRC) Satellite product (red line). Coherency spectrum (bottom) between TSG SSS transects and collocated Aquarius SSS L4 OI v5 - Monthly (IPRC) Satellite product.

Figures showing the mean and standard deviation (STD) maps of Satellite SSS across each TSG transect period, along with Satellite and TSG SSS plotted against cumulative distance and their corresponding individual spectra, are provided for each TSG transect in the following document: [pimep-spectrum-report_NAO_aquarius-l4-iprc-v5-1m.pdf](#).

Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_NAO_aquarius-l4-iprc-v5-1m.nc](#).

4.25.2 Topical Atlantic region

Figure 152 shows the average spectra (top panel) of the 21 TSG transects (black line) and collocated Aquarius SSS L4 OI v5 - Monthly (IPRC) Satellite product (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated Aquarius SSS L4 OI v5 - Monthly (IPRC) Satellite product.

Figure 152: Density spectra (Top) calculated from averaging 21 TSG transects (black line) and collocated Aquarius SSS L4 OI v5 - Monthly (IPRC) Satellite product (red line). Satellite and TSG SSS, individual Satellite and TSG spectra for each TSG transects, average spectra and the corresponding coherency spectrum are provided in the following NetCDF file: [pimep-tsg-spectra_WPO_isas.nc](#).

5 Density and Coherency spectra

5.1 North Atlantic region

Figure 163 show the average spectra (top panel) of the 55 TSG transects (black line) and collocated Satellite products (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated satellite products.

Figure 163: Density spectra (Top) calculated from averaging 55 TSG transect (black line) and collocated Satellite product (red line) spectra. Coherency spectrum (bottom) between TSG SSS data and collocated SSS satellite product for the **North Atlantic region**.

Figure 163 is also available as an animated gif : [Spectra_NAO.gif](#).

5.2 Topical Atlantic region

Figure 164 show the average spectra (top panel) of the 21 TSG transects (black line) and collocated Satellite products (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated satellite products.

Figure 164: Density spectra (Top) calculated from averaging 21 TSG transect (black line) and collocated Satellite product (red line) spectra. Coherency spectrum (bottom) between TSG SSS data and collocated SSS satellite product for the **Topical Atlantic region**.

Figure 164 is also available as an animated gif : [Spectra.TAO.gif](#).

5.3 Tropical Pacific region

Figure 165 show the average spectra (top panel) of the 29 TSG transects (black line) and collocated Satellite products (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated satellite products.

Figure 165: Density spectra (Top) calculated from averaging 29 TSG transect (black line) and collocated Satellite product (red line) spectra. Coherency spectrum (bottom) between TSG SSS data and collocated SSS satellite product for the **Tropical Pacific region**.

Figure 165 is also available as an animated gif : [Spectra.TPO.gif](#).

5.4 Arctic region

Figure 166 show the average spectra (top panel) of the 29 TSG transects (black line) and collocated Satellite products (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated satellite products.

Figure 166: Density spectra (Top) calculated from averaging 29 TSG transect (black line) and collocated Satellite product (red line) spectra. Coherency spectrum (bottom) between TSG SSS data and collocated SSS satellite product for the **Arctic region**.

Figure 166 is also available as an animated gif : [Spectra_ARCO.gif](#).

5.5 Southern Ocean region

Figure 167 show the average spectra (top panel) of the 62 TSG transects (black line) and collocated Satellite products (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated satellite products.

Figure 167: Density spectra (Top) calculated from averaging 62 TSG transect (black line) and collocated Satellite product (red line) spectra. Coherency spectrum (bottom) between TSG SSS data and collocated SSS satellite product for the **Southern Ocean region**.

Figure 167 is also available as an animated gif : [Spectra.SO.gif](#).

5.6 Western Pacific region

Figure 168 show the average spectra (top panel) of the 49 TSG transects (black line) and collocated Satellite products (red line). The bottom panel presents the coherency spectrum between TSG SSS transects and collocated satellite products.

Figure 168: Density spectra (Top) calculated from averaging 49 TSG transect (black line) and collocated Satellite product (red line) spectra. Coherency spectrum (bottom) between TSG SSS data and collocated SSS satellite product for the **Western Pacific region**.

Figure 168 is also available as an animated gif : [Spectra.WPO.gif](#).

6 Spectral slopes and effective resolution

Generally, for wavelengths over 100 km, spectral slope range from $-5/3$ to -3 . For example, combining in situ data and numerical results, [Droghei et al. \(2016\)](#) determined that in the SPURS-1 experiment in the subtropical North Atlantic, the spectral slope is $-5/3$ for scales larger than 200 km, sharpening to -3 near 125 km.

Similarly, [Nardelli et al. \(2016\)](#) observed, using SMOS satellite data and in situ measurements, that spectral slopes in the mesoscale range (less than 325 km) across a wide zonal band in the Southern Hemisphere (10°S – 65°S) vary between -2 and -3 .

More recently, [Yi and Wang \(2024\)](#) calculate spectral slopes of SSS variance at mesoscales in the near-global ocean and link the spectral slopes with the geostrophic turbulence energy spectrum. They also compare Aquarius satellite results with high-resolution TSG in situ measurements in terms of SSS spectral slopes.

Here, we proposed to compute the spectral slopes in two ranges of scales, naming the large scale range for wavelength between 1000 and 200 km, and the mesoscale range for wavelength between 125 and 25 km, using the average spectra of TSG and satellite products for each 6 regions.

6.1 North Atlantic region

Table 1 presents the spectral slopes derived from the averaged TSG spectrum for the Tropical Pacific region across two ranges of scales. Similarly, Table 2 provides the spectral slope estimates for each satellite product in the same region. The effective resolution of each product is indicated as the wavelength where the coherency spectrum equals 0.5.

Table 1: TSG Spectral Slope Estimates

Slopes ([1000 - 200] km)	Slopes ([125 - 25] km)
$-2.239(\pm 1.003)$	$-2.276(\pm 0.037)$

Table 2: Satellite Spectral Slopes and effective resolution estimates

Satellite products	Slopes ([1000 - 200] km)	Slopes ([125 - 25] km)	Effective resolution [km]
SMOS SSS L3 v332 - 9 Days (CATDS-CPDC)	$-1.904(\pm 0.751)$	$-1.430(\pm 0.271)$	264

7 Conclusion

As shown in the previous section, the effective resolution of a specific satellite SSS product can vary from one geographical region to another due to several key factors:

- **Variability in Surface Conditions:** Surface roughness can differ greatly across regions, affecting the uncertainty on SSS retrievals by L-band sensors. For instance, open ocean surfaces typically exhibit less variability compared to coastal areas, where features such as islands, landmasses, and varying water properties complicate the measurement. This can reduce the effective resolution, particularly in regions with high surface variability like coastal zones, river plumes or areas with ice cover.
- **Sampling Density and Data Averaging:** The effective resolution is also influenced by the satellite product sampling strategy. In regions with sparse data points, data may be averaged over larger areas, resulting in a coarser resolution compared to areas with denser data collection.
- **Instrument Sensitivity to Regional Conditions:** The sensitivity of satellite instruments to local environmental factors, such as sea surface temperature, can affect resolution. SSS retrievals from L-band microwave radiometers are more effective in warm, open waters than in regions with cooler temperatures or higher levels of environmental noise, such as areas with sea ice or freshwater plumes.
- **Temporal Resolution and Data Gaps:** The frequency of satellite revisits to different regions can also affect the quality and resolution of the product. Polar regions may have more frequent satellite passes due to the convergence of orbits, but this can lead to overlapping swaths and challenges in data merging. On the other hand, equatorial regions may receive less frequent coverage, impacting temporal resolution.

The Arctic region presents the greatest challenge, as all satellite coherency spectra show correlations below 0.5 across all wavelengths, resulting in undefined effective resolution estimates according to our methodology. The TSG SSS data generally exhibit very little variability in this region, and retrieving SSS from satellites is particularly challenging due to the low sensitivity of L-band brightness temperature in cold waters.

For the same reason, almost no effective resolution estimates are available for the southern ocean region. Only L4 products that incorporate in situ data can adequately resolve scales on the order of 100 km.

For the 4 other regions, coherency spectra decline at wavelengths between 200 and 300 km depending on the satellite product. This indicates that these products cannot consistently resolve scales smaller than half of their respective effective resolution estimates.
